There are no try-outs for this program. Academy is for the player that wants to have an additional level of training and to play in a more competitive environment.

The Academy program is able to provide each player training with players of similar ability. The program is also able to provide a consistent level of competition in each game. With the practices and games, the program assures a more consistently competitive environment than that of the recreational leagues. The emphasis is on development, not winning, losing or how many goals are scored.

The focus of the Academy is to teach the players the necessary technical skills to compete at the next level. This will include proper dribbling, passing, shooting, and receiving techniques. Other skills we emphasize are agility, speed training and goal keeping. Due to the knowledge and experience of the staff and like abilities of the players at practice and games the individual is constantly challenged. We hope with providing this environment and challenges each player will excel to the next level of play.

The Academy is staffed with USSF nationally licensed coaches. Each has a minimum National "D" or National Youth License, or is enrolled in future courses to accomplish this. The staff uses positive and creative training sessions to provide an atmosphere that will help the child develop as a soccer player. The staff stimulates the player to learn to problem solve on their own.

The Academy program and staff encourages each player to learn self-discipline, work ethics and good sportsmanship. There is also a focus on teaching respect for one's self and others they come in contact with. The largest goal of the program is to develop a PASSION for the sport of soccer.
